

DESCO

printing systems for the container and closure industries

Leader in Large Container and Closure Printing Equipment

Company Profile

Plastic Printing Leader

Founded in 1985 with the goal of becoming one of the world's leading manufacturers of large container and closure printing systems, Desco quickly earned a reputation for delivering outstanding quality, dependability, and customer service.

High Speed Precision

As an industry innovator, Desco has consistently exceeded customers' expectations for the most demanding high speed applications in the closure industry as well as for the most precise, predictable printing systems for pails and large container applications.

Many of Desco's largest clients are world leaders in the following sectors:

- Soft Drinks
- Industrial Containers
- Water Bottles
- Horticulture
- Paints
- Industrial Lids

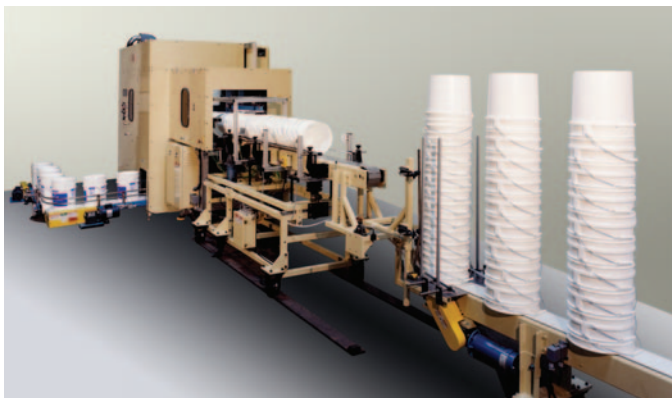

All-Inclusive Printing

Since becoming a part of the Apex Group, Desco has expanded its capabilities to include custom machine engineering and a complete graphics department.

Capex Corporation, another part of the Apex Group, brings specialty blended printing inks and on demand printing plate production and supply to Desco customers. Desco has become a one-stop-shop for any type of closure, pail, lid, or container printing requirement.

We specialize in these types of applications:

- Up to 4000 plus parts per minute closure printing
- Printing containers up to 7 gallons
- Highlighting / tipping on raised surfaces
- Printing inside closures
- Multicolor applications
- 360° photo like images on containers
- Lid printing up to a maximum diameter of 9" (228mm)

Desco also produces a host of ancillary equipment that can be interfaced with our printing machinery and customized to meet your requirements:

- Feeding Systems
- Restacking Equipment
- Inspection Systems
- Counting Systems
- Packaging & Boxing Equipment

Selecting a Printing Machine Manufacturer

Advanced Manufacturing

State of the art equipment manufacturing techniques developed over the last three and half decades enable Desco to meet the most exacting specifications of discerning clients in the soft drink, water, paint, industrial, horticulture, and commercial sectors -- and at some of the most competitive prices in the industry.

Quality Standards

Desco has developed standards essential for producing and maintaining the high quality level of our systems. Our over-riding goal is to produce a better Desco machine and a more satisfied Desco customer with every system that is delivered.

Engineering

Our team is dedicated to Engineering & Manufacturing Excellence. Desco utilizes the latest design software, and our team of engineers are experts in their fields. Our manufacturing facility utilizes state-of-the-art equipment to ensure superior quality machinery.

Quality Control

Each part is inspected and part numbered before construction.

After the build is completed, every system is fully tested in an FAT (Factory Acceptance Test) for your approval prior to shipment using tailormade skids and crates.

Key Criteria

There are several key criteria to consider when selecting a printing machine manufacturer

Cost

Will the company help you find the most efficient and least expensive solution that will meet your needs?

Quality

Does the company produce quality products supported by solid documentation and well developed processing systems?

Does it have stringent manufacturing practices and quality controls in place?

Customer Service

Does the company have experienced personnel to guide you through the order process from concept to delivery and ensure that every part of it meets and exceeds your expectations?

Capacity

Does the company have the capacity and capability to provide you with your equipment in the timeframe promised?

Customer Satisfaction

Does the company make your machinery right the first time and does it stand behind its equipment?

Service & Support

Does the company have the reputation of providing superior service, support, and assistance after systems are delivered?

Innovators of High Quality, Cost Efficient Printing Systems for the Large Container, Lid and Closure Industries

Cutting Edge Technology

Hablamos Espanol

"Hablamos Espanol," asserts Desco Machine Company's Bob Coningsby. "We are proud to count many Latin American companies among our clients, and we are happy to serve them in their native tongue."

"Hablamos Espanol," afirma Bob Coningsby de Desco Machine Company. "Estamos orgullosos de contar con muchas compañías latinoamericanas entre nuestros clientes, y nos complace servirles en su lengua materna".

Support - Every Step of the Way

Instruction Manuals

A complete instruction manual is supplied with every system. Your manual will include broad based instructions and detailed instructions for set up, testing, and trouble-shooting.

Spare Parts

A recommended spare parts list is provided with each system. Standard items are maintained in our inventory and typically ship within 24 hours. Non-standard items are provided as quickly as possible, and we will always provide an estimated shipment date.

Continuing Support

Desco staff members are available at any time for consultation in all areas of our equipment and supplies. We work with you every step of the way to ensure that your printing machine has the long, trouble-free life typically associated with all Desco equipment. Desco service technicians travel worldwide installing, maintaining, and servicing our equipment, and we are committed to providing the highest quality printing equipment, consumable products, and most importantly, superior service to our customers. We are here to help you no matter where you are in the world!

Printing System Rebuilding

After many years of continuous use, your printing machine will start to wear. Continuing to operate a worn machine can result in a drop in production and damage to the machine. If you would like to bring your printing system back to factory specifications, consider our rebuilding services. At your factory or in ours, tune up or full scale, our expert technicians can update your system with the latest technology, electronics, and controls or keep it as simple as replacing worn parts and adjusting your settings.

At the same time you can have the advantage of upgrading guarding and safety systems to meet the latest international safety requirements and specifications.

Open Factory

We welcome and encourage you to visit our factory at any time before, during, and after the construction of your machinery. Please let us know when you would like to visit.

Is it any wonder that a growing number of companies throughout the world rely on Desco Machine Company to provide solutions for all their closure, pail, lid, and large container printing needs?
